

HOWTO: Add Barcodes to an AtalaImage in our ImageViewer WinForms Control

The BarcodeWriter class can be used to add barcodes to an AtalaImage. The following code is a simple example to add a barcode to an image in a viewer in the location of the rectangle selection:

C#

```
BarcodeWriter writer = new BarcodeWriter(BarcodeStyle.Code39);  
writer.Render("00100",imageView1.Image.GetGraphics(), imageView1.Selection.Bounds);  
imageView1.Refresh();
```

VB.NET

```
Dim writer As New BarcodeWriter(BarcodeStyle.Code39) writer.Render("00100",  
imageView1.Image.GetGraphics(), imageView1.Selection.Bounds) imageView1.Refresh()
```
