

## Legacy Controls NOTICE

This article references our legacy Web Forms Web Viewing controls (WebImageViewer, WebAnnotationViewer, WebThumbnailViewer). It is preserved for archival purposes, but support strongly recommends using our modern HTML5 web controls: WebDocumentViewer, WebDocumentThumbnailer instead)

[INFO: WebDocumentViewer Whitepaper - Getting Started With Web Viewing](#)

## Main Article Content

Sometimes, it is desirable to create annotations on the WebAnnotationViewer with the click of a button... without direct user intervention for "drawing" the annotation location.

The attached application will give you a sample of how to create "Rubber stamp annotations" that you can predefine for you end users. (i.e. "draft", "Confidential", "private")
